9  Attribute VB_Exposed = False
10 '@Folder("Database.Production.Forms")
11 Option Compare Database
12 Option Explicit
13
14 '1. Authenticate a User . This involves accepting the user's username and password and
    verifying
15 'it with Stamps.com servers. This is usually done once at the beginning when the application is
16 'launched. You can either use a login screen that is shown at the time of launch or you can save
17 'the settings and log in the user in when they launch the application. The latter usually offers
18 'lower security, so the former is the recommended behavior.
19 '2. Get User's Account Information . This provides a lot of information about the status of a
20 'Stamps.com user account including postage balance and user access restrictions. It can help
    you
21 'anticipate a user's needs and capabilities and build a great user experience. However, when
22 'using it, you should exercise caution as it reaches out to a number of our servers and can
23 'slow your application down.
24 '3. Purchase Postage . As described in the prior section, users will have to purchase and
    maintain a
25 'postage balance. Most Stamps.com subscriptions usually come with a small amount of free
26 'postage for the user (usually $5) but to continue printing postage the user will have to
    purchase
27 'postage from time to time.
28 '4. Generate a Shipping Label . To print postage you have to go through a 3 step process.
```

29 "a. Verify Address . This step helps ensure that a valid and properly formatted recipient
30 'address is being used. This step allows the USPS to process packages quickly and easily.
31 "b. Get Rates . In this step you request the various USPS services available to the user. In
32 'SWS/IM this will require a minimum of an origin and destination zip codes. You then
33 'show the user the options they have to ship with the USPS, the cost involved and the
34 'time it can take to ship a package from origin to destination.
35
36 "c. Request a Label . Once the user has selected a USPS service you provide the user f
37 'selection to an SWS/IM web method along with the verified address to receive a
38 'shipping label.
39
40
41 'check all stages completed
42 'needs address selector
43 'select mail type
44 'weight
45 'mailnig history (date shipped, received, tracking number)
46 'add labels to document history
47 'ship button
48 'cancel
49
